

**Amendments to the Claims**

Please amend the claims as shown below in the complete listing of claims.

- 1-2. (Canceled)
3. (Previously Presented) The bare floor cleaner of claim 25 wherein the at least one component undergoes a phase change during the exothermic process.
4. (Previously Presented) The bare floor cleaner of claim 25 wherein the exothermic process is an exothermic chemical reaction.
5. (Previously Presented) The bare floor cleaner of claim 25 wherein the exothermic process is reversible and the thermal storage body can be reused.
6. (Previously Presented) The bare floor cleaner according to claim 25 wherein the thermal storage body comprises a resilient pad.
7. (Previously Presented) The bare floor cleaner according to claim 25 and further comprising a resilient pad and the resilient pad is positioned between the thermal storage body and the cleaning implement.
8. (Previously Presented) The bare floor cleaner according to claim 25 wherein the cleaning implement comprises a cleaning cloth.
9. (Previously Presented) The bare floor cleaner according to claim 25 wherein the thermal storage body is removably mounted to the upright handle for placement in a heating device.
10. (Original) The bare floor cleaner according to claim 9 wherein the thermal storage body is removably mounted to the cleaning head for placement in a heating device.

11. (Previously Presented) The bare floor cleaner according to claim 25 wherein the thermal storage body is directly adjacent the cleaning implement.

12. (Previously Presented) The bare floor cleaner according to claim 25 wherein the at least one component that is microwave active and the thermal storage body is encapsulated by a resilient pad.

13. (Canceled)

14. (Previously Presented) The bare floor cleaner according to claim 26 wherein the heat active fluid is adapted to absorb microwave energy.

15. (Original) The bare floor cleaner according to claim 14 wherein the solid phase undergoes a phase change.

16. (Original) The bare floor cleaner according to claim 15 wherein the liquid phase comprises a water and alcohol mixture and the solid phase comprises an organic wax with a melting point of at least 30 °C but no greater than 65 °C.

17. (Original) The bare floor cleaner according to claim 16 wherein the melting point of the organic wax is within a range of 53 °C to 57 °C.

18. (Previously Presented) The bare floor cleaner according to claim 26 wherein the thermal storage body further comprises a mechanical re-emulsifier.

19. (Previously Presented) The bare floor cleaner according to claim 26 and further comprising a resilient pad positioned between the thermal storage body and the cleaning implement and wherein the resilient pad is porous to thermal energy which can pass from the thermal storage body to the cleaning implement over an extended period of time.

20. (Previously Presented) The bare floor cleaner according to claim 25 wherein the upright handle is removably mounted to the cleaning head whereby the cleaning head can be manipulated by hand to clean a hard surface without the handle.

21. (Previously Presented) The bare floor cleaner according to claim 25 wherein the thermal storage body comprises a gel.

22. (Canceled)

23. (Cancelled)

24. (Cancelled)

25. (Previously Presented) A bare floor cleaner comprising:  
a cleaning head;  
an upright handle pivotally mounted to the cleaning head so that a user can grasp the handle and move the cleaning head across the surface to be cleaned from an upright position;  
a liquid impregnated cleaning implement associated with the cleaning head and adapted to move along a surface to be cleaned; and  
a self-contained thermal storage body associated with the cleaning head and adjacent to the cleaning implement, the thermal storage body being adapted to store thermal energy and to release the stored thermal energy over an extended period of time to the cleaning implement and comprising at least one component that carries out an exothermic process to release the thermal energy.

26. (Previously Presented) A bare floor cleaner comprising:  
a cleaning head;  
an upright handle pivotally mounted to the cleaning head so that a user can grasp the handle and move the cleaning head across the surface to be cleaned from an upright position;  
a liquid impregnated cleaning implement associated with the cleaning head and adapted to move along a surface to be cleaned; and

a thermal storage body associated with the cleaning head and adjacent to the cleaning implement, the thermal storage body being adapted to store thermal energy and to release the stored thermal energy over an extended period of time to the cleaning implement and comprising a liquid phase of a heat active fluid and a solid phase suspended in the liquid phase.

27. (Previously Presented) A hard surface cleaner comprising:  
a cleaning head;  
a liquid impregnated cleaning implement associated with the cleaning head and adapted to move along a surface to be cleaned; and

a self-contained thermal storage body associated with the cleaning head and adjacent to the cleaning implement, the thermal storage body being adapted to store thermal energy and to release the stored thermal energy over an extended period of time to the cleaning implement and comprising at least one component that carries out an exothermic process to release the thermal energy.

28. (Previously Presented) The hard surface cleaner of claim 27 wherein the at least one component undergoes a phase change during the exothermic process.

29. (Previously Presented) The hard surface cleaner of claim 27 wherein the exothermic process is an exothermic chemical reaction.

30. (Previously Presented) The hard surface cleaner of claim 27 wherein the thermal storage body comprises a liquid phase of a heat active fluid and a solid phase suspended in the liquid phase.

31. (Previously Presented) The hard surface cleaner according to claim 30 wherein the solid phase undergoes a phase change during the exothermic process.

32. (New) The bare floor cleaner according to claim 25 wherein the liquid impregnated into the cleaning implement comprises at least one of a liquid cleaner and a polisher.

Serial No. 10/708,132  
Filed: 02/09/2004  
Page 6 of 9

Examiner: Gary K. Graham  
Group Art Unit: 3723

33. (New) The bare floor cleaner according to claim 26 wherein the liquid impregnated into the cleaning implement comprises at least one of a liquid cleaner and a polisher.

34. (New) The hard surface cleaner according to claim 27 wherein the liquid impregnated into the cleaning implement comprises at least one of a liquid cleaner and a polisher.
